

Apple Core

Supplies:

Popsicle Sticks
Apple template
Scissors
Black Paper
Glue
Crayons (optional)

Instructions:

Using the template, cut out some apples by tracing it onto your construction paper. You could also cut out the template and color it.

Take three popsicle sticks and lay them beside each other. Glue the top of the sticks to the top of the apple piece, and the bottom of the sticks to the bottom of the apple piece. Make sure to leave room in the center so that the popsicle sticks are exposed.

Cut out little pieces from the black paper to resemble apple seeds.

Glue the black seeds to the exposed popsicle sticks.
