

# TISSUE PAPER RAINBOW INSTRUCTIONS

## Supplies:

- Tissue paper squares
- Glue
- Rainbow Template
- Cotton Balls

## Instructions:

First, apply glue to a section of the first row on the rainbow.

Start adding the red tissue squares onto the applied glue by first crumbling them up. This part is meant to be "messy" the tissue paper doesn't need to go perfectly onto the paper. It's supposed to be almost 3D looking and ruffle-ly.

Continue the same process for all the rows of the rainbow with it's corresponding color. (There is an extra row, you can do another row of purple, or leave it blank, or color it, be creative!

Once you have completed putting on the tissue paper, apply some glue to the clouds and apply the cotton balls. Apply the cotton balls by stretching them, almost tearing them apart. You want them to be thin and cloud like!
